Response

Please refer to the attached spreadsheet *PRS-4869 OIA OC00146 ATAR Conversion* which contains the information on the:

- 1) Weightings of all NCEA Level 3 standards used for ATAR score conversion in 2022 (Weightings tab refers).
- 2) Number of candidates who received 90 or more excellence credits in 2022 (Student Counts tab refers).
- 3) Minimum, maximum and median converted ATAR scores of students with 90 or more excellence credits in 2022 (Student Counts tab refers).
- 4) Number of candidates who received a converted ATAR score between 99.50 and 99.95 in 2022 (Student Counts tab refers), and
Number of candidates with 90 or more excellence credits who received a converted ATAR score between 99.50 and 99.95 in 2022 (Student Counts tab refers).

Background

The ATAR is a ranking exercise. Therefore, the top 0.05% of the cohort may be a different number of students each year as the population changes. Unit Standards are always ranked below University Entrance List of approved Achievement Standards, regardless of their weightings. The relative difficulty for the same standard and version varies from year to year due to changes in the cohort and other circumstances. The best performing students (top 0.05% of the cohort) may also have a different combination of results each year.

The weightings given are adjusted by the number of credits the standards are worth for the best 90 credits. For example, two standards with the same adjusted difficulty worth 3 credits each, will be the same aggregate as a third standard with the same difficulty worth 6 credits. Higher adjusted percentiles are worth more, but in the case when the percentile is exactly 1, no students got that grade whether it was available or not.

For additional background information, please refer to our response of 14 October 2022 to your previously submitted OIA [CR25220 refers].
