

W_____ High School performed the cultural festival on last Saturday night that gave us a lot of useful information of each culture such as Japan, Korea, China and Germany. What an incredible Saturday evening. My purpose is to write a review for the school magazine.

- ① The festival first started with food markets. There were several foods presented for each country. All the international students went to the school kitchen to prepare and cook their foods. The cooking took half day to be done for present to the cultural festival. Some of the Kiwi students came to help our working and they all worked extremely hard to make that lovely night for the audience.
- ② The food market was closed after half an hour then people went back to their seats to watch the performances that the international students had organised and practised for few months ago. That was a big surprise for me when the traditional dance of Thailand was on because it was gorges and the combinations between music and the costumes were perfect. I enjoyed that dance. The next show that I felt exciting was the dance of the Germans... They used an eventful song to warm our hall up. Everyone became more vibrant after their performance. To continue the excitement was the South Korean pop dance. In my country or even here, the Kpop dances are really famous, so there are no wonder that people, especially the teenagers were so enjoyable to the South Korean dance. "Bang Bang Bang" what a thrilling song!
- ① There were some more interesting performances that I couldn't list them all. To finish the cultural festival was the song "Can't stop the felling" that presented by all the international students, which was the part that I liked the most. Everyone sang that song like a big family. I would like to give thanks to all the teachers had organised the cultural festival and also thanks for all the hardworking international students that participated in cooking and performances. Well done for all.
