

All images in this layout will relate to my theme. The contrast is higher to catch the viewers attention. The white creates a composition where there is always something new to discover.

I have used a variety of images and colours to make the composition layout more effective and appealing.

I have used contrasting images and text with a variety of subjects to promote my theme 'Vent' (the theme park in the sky). The text will create an appealing sidebar that is going to attract the viewer's eye.

I have used the cutout model (fancier children which have interesting, different and eye-catching composition).

I have used a circle to create a balloon shape and the triangle shape inside to create a pattern on the balloon, this makes my work original and appealing.

You can see glimpses of my 'Vent' theme park. The white background creates the circle shape creates as the main focal point.

The text all works with one another / complements each other so it becomes more attractive and works well as a composition.

The colours will be bright and the use of coloured balloon to contrast with each other and attract the viewers attention.

The colours will be blue and orange, they will contrast because they are opposite each other on the colour wheel.

The white text contrasts with the colour to create an effective and appealing cover page.

I have used both hands and rollercoasters to create a sense of realism and to relate the images to my theme.

I will use bright colours to create contrast and to attract the viewers attention.

I have used the artist model (fancier children) because they have a great sense for design that works well as a composition and layout.

I placed the title 'Vent' in the sidebar, links with the idea of my theme park being in the sky.

I will use bright blue colours that create a bright and happy cover page that will attract the viewer.

I will use bold fonts to make the text easy to read and appealing to the viewer.

I found the cutout map on the 'city of the world' side and found it to work really well as a composition and layout.

*I have used imagery/pictures that relate to my theme to create the look I want. I also added something extra and different to my work. The contrast is high to attract visual attention.*

*I have used small and large contrast to create a more appealing composition. The text is white and grey which contrasts well with the coloured background.*

*I have used blocks and white to contrast with each other. I have a white background to make the blocks text easy to read and appealing to the audience.*

*I have used the colour blue as my main colour to link with the colour of the sky which relates to my theme parts in the sky. The contrast is high to create a more appealing composition.*

*I have used images that relate to my work, that show a variety of subjects. The text will be grey so the composition is not to busy.*
